

SAFE, EFFICIENT AND RELIABLE

Railcar Repairs

Our experienced teams handle a range of mechanical repairs, service equipment maintenance and qualification (C5 & C6r Certified), and structural repairs. We keep your fleet in-service and compliant without the logistical delays and bottlenecks of shop-bound solutions.

We work with our customers to prioritize urgent repairs, minimize down times and get their cars back in service more efficiently. We eliminate unnecessary transportation costs and storage times with mobile repairs to get their cars back in service while skipping the shop lines.

Key Services

- ✓ **On-Site Railcar Repairs:** Work is performed at storage yards, terminals and client sidings with AAR C5 and C6r certified technicians: Inspections, brake tests and repairs, truck and 88B repairs, valve and coil testing (Replacement of parts such as valves and gaskets), gate and unloading repairs, general repairs, safety compliance repairs, welding repairs, and valve rebuilds.
- ✓ **Minor Mechanical Fixes:** Couplers, gaskets, manway seals, valves, fittings, and more.
- ✓ **Inspection & Compliance Support:** Ensure readiness for AAR or Transport Canada regulations. Identify the need for preventive maintenance or repairs.
- ✓ **Repair Documentation:** Digital records provided for each serviced car.
- ✓ **Support for Cleaning Clients:** Fast repairs post-cleaning to ensure turnaround efficiency.

Key Benefits

- ✓ Reduces downtime and costly shop transfers.
- ✓ Keeps your fleet compliant and operational.
- ✓ Improves logistics and fleet utilization.
- ✓ Ideal for turnaround projects, shutdowns, and remote locations.
- ✓ Rapid mobilization across Western and Central Canada.
